PROFESSIONAL SUMMARY

I am a Sudanese Electrical Communication and Electronics Engineering student at Alexandria University, with a passion for web development and graphic design. I have hands-on experience in web development, working with technologies such as HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB. Additionally, I am proficient in languages like Java, Python, and JavaScript. Alongside my technical skills, I have a strong background in graphic design, with expertise in Photoshop and Illustrator, focusing on social media designs, logos, packaging, and some video editing. I'm highly skilled in data entry and comfortable using various computer tools to streamline tasks. I am always eager to learn, grow, and apply my skills in creative and technical projects.

Ozone International School

Elementary and Middle School – American Curriculum
2010-2018

GRAPHIC DESIGN

Social Media Design

Made fun and engaging posts for my teams to connect with people.

Logo Design

Designed logos for small businesses and relatives, focusing on what makes each brand unique.

Design Process

I get ideas from sites like Dribbble, Behance, and Pinterest. I like modern styles and bold fonts that stand out.

Working with Others

I like working alone, but I also enjoy when teammates give feedback. It helps make my designs even better.

WEB DEVELOPMENT

Passion for Websites

I'm always thinking about how to make websites better, no matter what I'm looking at.

First Project

Built my first website with vanilla JavaScript, including dropdowns, expandable panels. It was challenging but rewarding.

Fixing Problems

I try to solve issues myself, but ask for help after 10–15 minutes if needed.

Why I Love It

Web development lets me build things the way I want and how I want.

VOLUNTEER EXPERIENCE

Civil Plus, Student Union

2023

- Gained new soft skills and made new friends.
- Developed strong teamwork.
- Attended valuable learning sessions.

Media Member, Qadda
